(1) Funds from operations and funds from operations per share are not recognized measures under International Financial Reporting Standards (IFRS). Refer to the commentary in the Management's Discussion and Analysis under "Non-IFRS Measurements" for further discussion.

(2) Total capital expenditures, including acquisitions and excluding non-cash transactions. Refer to commentary in the Management's Discussion and Analysis under "Capital Expenditures and Acquisitions" for further information.

(3) Current assets less current liabilities, excluding current derivative financial instruments.

(4) For a description of the boe conversion ratio, refer to the commentary in the Management's Discussion and Analysis under "Other Measurements".

# LETTER TO SHAREHOLDERS

We are very pleased to report our financial and operating results for the first quarter of 2013. Our financial and operational accomplishments for the period include:

- Record average daily production of 5,926 boe/d, up 95 percent from the first quarter of 2012 and 11 percent from the fourth quarter of 2012.
- Average daily production of crude oil and liquids rose to 4,213 bbls/d (71 percent crude oil and NGLs), representing a 163 percent increase over the first quarter of 2012 and a 12 percent increase over the fourth quarter of 2012.
- Funds flow from operations grew to \$16.8 million, representing a 192 percent increase over the first quarter of 2012 and 4 percent improvement over the fourth quarter of 2012.
- Invested \$41.6 million in our capital program, including the drilling of 8 (7.19 net) wells, achieving an 88 percent success rate.
- Increased the amount of funds available under our credit facility with our existing syndicate of lenders from \$90 million to \$135 million.
- Completed an underwritten common share offering at the issue price of \$6.80 per common share for total net proceeds of \$32.2 million, including funds received on the exercise of the over allotment option.
- Exited the quarter with total net debt of \$70.2 million. Debt to annualized cash flow ratio at quarter end was 1.04:1.

Our first quarter successes combined with better than expected, and generally improving drilling results, resulted in an increase in our 2013 guidance following quarter end. Most significantly, we now expect our 2013 exit rate to be in the range of 9,600 – 10,000 boe/d (81 percent crude oil and NGLs) and our 2013 average production to be in the range of 7,600 – 8,000 boe/d (76 percent crude oil and NGLs).

## Operational Update

We invested \$41.6 million in our capital program during the first three months of 2013, principally directed at our drilling program. Drilling activity included the rig release of 6.0 gross (5.9 net) wells on our Brazeau Belly River property, one 100 percent working interest well on our Ferguson Alberta Bakken property and 1.0 gross (0.22 net) non-operated well on our property in the Peace River Arch area of northern Alberta.

We focused primarily on our Brazeau Belly River property throughout the first quarter, taking advantage of winter drilling conditions and access, available capacity in our facilities and favourable oil price differentials. The highlight for the quarter was the drilling of a Brazeau Belly River horizontal well that flowed at the final rate of 1,580 bbl/d of crude oil at the conclusion of a four day test (refer to our April 8, 2013 news release for additional information). This well is currently in the process of being tied-in and is expected to be on production by the end of May, 2013. Our results in the area are continually improving and we plan to commence our summer drilling program in the area in July.

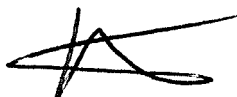

We have been very active on our Ferguson Alberta Bakken property since quarter end where we currently have two rigs drilling. Subsequent to March 31, 2013, we drilled, completed and tested 2.0 (2.0 net) Bakken wells highlighted by a significant step out well that flow tested at the highest rate we have experienced to date from wells drilled on the property. After fracture stimulation, the well continued to flow for five days up a 4 ½" frac string at an average rate of 1,560 Bbls/d of 29° API reservoir oil with a final rate of approximately 1,360 bbls/d of oil (on a ¾" choke at a wellhead pressure of 150 psi). Final water cuts at the end of the test were approximately 40 percent. The well was drilled to a planned total depth with a horizontal lateral of approximately 3,200 metres. The horizontal lateral was successfully fracture stimulated placing 400 tonnes of sand over 22 stages using an energized water based system. The well was also significant in that it extended the edge of the Company's existing Bakken pool by another two miles.

## Outlook

On April 24, 2013 we announced an increase to our 2013 guidance. Our forecasted 2013 capital expenditures increased to \$160 million from \$150 million and, as described above, increased our 2013 average and exit production guidance. We continue to protect our future cash flow through the use of financial hedges and year to date we have hedged an additional 1,000 bbls/d of crude oil at a fixed price of WTI-NYMEX \$97.43 CAD for 500 bbl/d (May, 2013 – December, 2013) and WTI-NYMEX \$95.03 CAD for 500 bbl/d (June, 2013 – December, 2013). We also locked in the crude oil differential on 500 bbls/d for May 2013 at \$2.65 CAD Edmonton sweet.

With a strong balance sheet and the continued positive results from its Brazeau Belly River and Ferguson Alberta Bakken properties, DeeThree is well positioned to achieve our objectives for 2013.

On behalf of the Board of Directors,

Martin Cheyne  
President & Chief Executive Officer

May 13, 2013

# MANAGEMENT'S DISCUSSION AND ANALYSIS

The following Management's Discussion and Analysis (MD&A) of the financial condition and results of operations for DeeThree Exploration Ltd. ("DeeThree" or "the Company") is dated May 13, 2013 and should be read in conjunction with the Company's unaudited interim financial statements and related notes for the three months ended March 31, 2013, as well as the Company's audited financial statements and related notes for the year ended December 31, 2012. The interim financial statements were prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

Additional information regarding the Company and factors that could affect its operations and financial results are included in reports on file with Canadian securities regulatory authorities, including the Company's Annual Information Form, and may be accessed through the SEDAR website ([www.sedar.com](http://www.sedar.com)), or at the Company's website ([www.deethree.ca](http://www.deethree.ca)). Furthermore, the forward-looking statements contained in this MD&A are made as of the date of this MD&A and the Company does not undertake any obligation to update publicly or to revise any of the included forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by applicable securities laws. The Company's forward-looking statements are expressly qualified in their entirety by this cautionary statement.

## Non-IFRS Measurements

This MD&A contains the terms "funds from (used in) operations" and "funds from (used in) operations per share", which should not be considered an alternative to or more meaningful than cash flow from (used in) operating activities as determined in accordance with IFRS. These terms do not have any standardized meaning as prescribed by IFRS. DeeThree's determination of funds from (used in) operations and funds from (used in) operations per share may not be comparable to that reported by other companies. Management uses funds from (used in) operations to analyze operating performance and leverage, and considers funds from (used in) operations to be a key measure as it demonstrates the Company's ability to generate cash necessary to fund future capital investments and to repay debt, if applicable. Funds from (used in) operations is calculated using cash flow from (used in) operating activities as presented in the statement of cash flows, before changes in non-cash working capital. DeeThree presents funds from (used in) operations per share whereby per share amounts are calculated using weighted-average shares outstanding, consistent with the calculation of earnings per share.

The following table reconciles funds from operations with cash flow from operating activities, which is the most directly comparable measure calculated in accordance with IFRS:

Three Months Ended March 31,	2013	2012
(000s)	(\$)	(\$)
Cash flow from operating activities	<b>18,000</b>	4,064
Abandonment and reclamation costs	<b>67</b>	34
Changes in non-cash working capital	<b>(1,279)</b>	1,643
Funds from operations	<b>16,788</b>	5,741

During the three months ended March 31, 2013, the Company's funds from operations totaled \$16,788,000 (\$0.23 per basic and diluted share), versus \$5,741,000 (\$0.09 per basic and diluted share) in the respective period of 2012.

The Company considers corporate netbacks to be a key measure as they demonstrate DeeThree's profitability relative to current commodity prices. Corporate netbacks are comprised of operating, funds flow and net income (loss) netbacks. Operating netback is calculated as the average sales price of the Company's commodities, less royalties, operating costs and transportation expenses. Funds flow netback starts with the operating netback and further deducts general and administrative costs and finance expense, and then adds finance income as well as realized gains on financial instruments. To calculate the net income (loss) netback, DeeThree takes the funds flow netback and deducts share-based compensation expense as well as depletion and depreciation charges, accretion expense, unrealized gains or losses on financial instruments, any impairment or exploration and evaluation expense and deferred income taxes. No IFRS measure is reasonably comparable to netbacks. See "Netbacks (per unit)" for the netback calculations.

Net debt and working capital (deficit), which represent current assets less current liabilities, excluding current derivative financial instruments, are used to assess efficiency, liquidity and the Company's general financial strength. No IFRS measure is reasonably comparable to net debt or working capital (deficit).

## Other Measurements

All financial figures are in Canadian dollars. Where amounts are expressed on a barrel of oil equivalent (boe) basis, natural gas volumes have been converted to oil equivalence at 6,000 cubic feet of gas to 1 barrel of oil. This conversion ratio of 6:1 is based on an energy-equivalent conversion for the individual products, primarily applicable at the burner tip, and does not represent a value equivalency at the wellhead. Such disclosure of boes may be misleading, particularly if used in isolation. Readers should be aware that historical results are not necessarily indicative of future performance.

## Forward-Looking Statements

Certain statements in this MD&A may constitute forward-looking statements. These statements relate to future events or the Company's future performance. All statements other than statements of historical fact may be forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar expressions. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. The Company believes that the expectations reflected in those forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be correct and such forward-looking statements included in this MD&A should not be unduly relied upon by investors. These statements speak only as of the date of this MD&A and are expressly qualified, in their entirety, by this cautionary statement.

In particular, this MD&A contains forward-looking statements pertaining to the following: projections of market prices and costs, supply and demand for natural gas and crude oil, the quantity of reserves, natural gas and crude oil production levels, capital expenditure programs, treatment under governmental regulatory and taxation regimes, and expectations regarding the Company's ability to raise capital and to continually add to reserves through acquisitions and development.

With respect to forward-looking statements in this MD&A, the Company has made assumptions regarding, among other things, the legislative and regulatory environments of the jurisdictions where the Company carries on business or has operations, the impact of increasing competition and the Company's ability to obtain additional financing on satisfactory terms.

The Company's actual results could differ materially from those anticipated in these forward-looking statements as a result of the risk factors discussed in this MD&A such as: volatility in the market prices for natural gas and crude oil; uncertainties associated with estimating reserves; geological, technical, drilling and processing problems; liabilities and risks, including environmental liabilities and risks inherent in natural gas and crude oil operations; incorrect assessments of the value of acquisitions; and competition for, among other things, capital, acquisitions of reserves, undeveloped lands and skilled personnel. In addition, test results are not necessarily indicative of long-term performance or of ultimate recovery.

This forward-looking information represents the Company's views as of the date of this MD&A and such information should not be relied upon as representing its views as of any subsequent date. DeeThree has attempted to identify important factors that could cause actual results, performance or achievements to vary from those current expectations or estimates expressed or implied by the forward-looking information. There may be other factors, however, that cause results, performance or achievements not to be as expected or estimated and that could cause actual results, performance or achievements to differ materially from current expectations. There can be no assurance that forward-looking information will prove to be accurate, as results and future events could differ materially from those expected or estimated in such statements. Accordingly, readers should not place undue reliance on forward-looking information. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as expressly required by applicable securities legislation.

## Description of the Company

DeeThree is a Calgary, Alberta-based resource company actively engaged in crude oil and natural gas exploration, development and production in key areas of the Western Canada Sedimentary Basin. DeeThree commenced operations in 2007 as a private company focused on creating long-term shareholder value through prudent operational and financial management.

DeeThree has created a platform for growth through a sound business strategy that includes low-risk development and exploration as well as strategic acquisitions. The Company has two core operating areas: the Brazeau area of west central Alberta, which is prospective for crude oil, natural gas and natural gas liquids, and the Ferguson area of southern Alberta, which features Bakken oil and shallow natural gas. These two core areas, along with the other non-core areas, have provided the Company with a balanced and diverse production base.

Common shares of DeeThree are listed for trading on the Toronto Stock Exchange under the symbol DTX and on the United States OTCQX under the symbol DTHRF.

In late 2008, DeeThree completed its first significant acquisition from a major oil and natural gas producer of properties in the Lethbridge area of southern Alberta, which became known as the Ferguson area. Ferguson was the Company's primary focus until late in the first quarter of 2011 when DeeThree closed a transformational acquisition of properties in the Peace River Arch and Brazeau areas. In this acquisition, which closed on March 22, 2011 (effective January 1, 2011), the Company acquired approximately 1,830 boe/d of primarily high-working-interest, operated crude oil, natural gas and NGL production and reserves, of which approximately 40 percent was crude oil and NGLs.

## First Quarter 2013 Transactions

On January 18, 2013, the Company executed a purchase and sale agreement with an oil and natural gas company pursuant to which DeeThree acquired interests in producing assets in the Peace River Arch area for consideration of approximately \$2,130,000 subject to certain adjustments.

On February 19, 2013, the Company issued 4,420,000 common shares at a price of \$6.80 per share for total gross proceeds of \$30,056,000 (\$28,042,000 net of estimated share issuance costs). The proceeds will be used to conduct development activity at Ferguson and Brazeau.

On March 12, 2013, the Company issued 663,000 common shares at \$6.80 per share for total gross proceeds of \$4,508,400 (\$4,192,000 net of estimated share issuance costs) on the exercise in full of the underwriters' over-allotment option from the February issuance.

## Subsequent Events

In April 2013, the Company increased its existing credit facility to \$135,000,000 from \$90,000,000. The increase in the credit facility was finalized on April 30, 2013.

On May 6, 2013, DeeThree entered into a commodity swap for 500 bbls/d of crude oil effective June 1, 2013 to December 31, 2013 at a fixed price of CAD \$95.03/bbl.

## Financial and Operating Results

### Sales Volumes

Three Months Ended March 31,	2013	2012
<b>Sales</b>		
Natural gas ( <i>mcf/d</i> )	<b>10,279</b>	8,657
Crude oil ( <i>bbls/d</i> )	<b>3,924</b>	1,316
NGLs ( <i>bbls/d</i> )	<b>289</b>	283
Total sales ( <i>boe/d</i> )	<b>5,926</b>	3,042
	(%)	(%)
<b>Production Split</b>		
Natural gas	<b>29</b>	47
Crude oil	<b>66</b>	43
NGLs	<b>5</b>	10
Total	<b>100</b>	100

For the first quarter of 2013, the Company's production averaged 5,926 boe/d compared to 3,042 boe/d in the same period of 2012 and 5,333 boe/d in the fourth quarter of 2012. This represents a 95 percent year-over-year and an 11 percent quarter-over-quarter increase, directly attributable to the Company's drilling success.

### Revenue

Three Months Ended March 31,	2013	2012
( <i>000s</i> )	( <i>\$</i> )	( <i>\$</i> )
Natural gas	<b>3,177</b>	1,706
Crude oil	<b>25,945</b>	10,595
NGLs and other	<b>1,368</b>	1,976
Total oil and natural gas revenue	<b>30,490</b>	14,277

During the three months ended March 31, 2013, revenue increased by 114 percent to \$30,490,000 from \$14,277,000 in the comparative period of 2012, and rose by seven percent from \$28,378,000 in the fourth quarter of 2012. These increases were a result of increased production from the Company's successful drilling program.

## Commodity Prices and Foreign Exchange

Three Months Ended March 31,	2013	2012
	(\$)	(\$)
<b>Benchmark Prices</b>		
Natural gas		
NYMEX (US\$/mmbtu) <sup>(1)</sup>	<b>3.35</b>	2.77
AECO (Cdn\$/GJ) <sup>(2)</sup>	<b>3.03</b>	2.03
Crude oil		
WTI (US\$/bbl)	<b>94.37</b>	102.93
Edmonton light (Cdn\$/boe)	<b>88.37</b>	92.48
<b>Average Realized Prices</b>		
Natural gas (\$/mcf)	<b>3.43</b>	2.17
Crude oil (\$/bbl)	<b>73.46</b>	88.45
NGLs (\$/bbl)	<b>49.33</b>	71.66
Combined average (\$/boe)	<b>57.17</b>	51.58
<b>Foreign Exchange</b>		
Cdn\$/US\$	<b>1.0089</b>	1.0012
US\$/Cdn\$	<b>0.9912</b>	0.9991

(1) Mmbtu is the abbreviation for millions of British thermal units. One mcf of natural gas is approximately 1.02 mmbtu.

(2) GJ is the abbreviation for gigajoule. One mcf of natural gas is approximately 1.05 GJ.

The Company's financial results are significantly influenced by fluctuations in commodity prices, including price differentials and foreign exchange rates. The Company seeks to protect itself from fluctuations in prices and exchange rates by maintaining an appropriate hedging strategy. As at the date of this MD&A, DeeThree had eight crude oil risk management contracts in place (see "Risk Management" below and "Subsequent Events" above for details). Most commodity prices are based on U.S. dollar benchmarks, which result in the Company's realized prices being influenced by the Canadian/U.S. exchange rates. The Company does not sell or transact in foreign currency, but may be affected by foreign currency exchange rate changes related to commodity prices as outlined above. As at the date of this MD&A, DeeThree also had two foreign currency exchange risk management contracts in place to mitigate these risks (see "Risk Management" below for contract details), one of which was entered into during 2011 and one of which was entered into during 2012.

During the three-month period ended March 31, 2013, benchmark natural gas prices in Canada were higher than the same period in 2012. In Canada, the benchmark index is the price set at the AECO hub, a major storage site near the TransCanada Energy pipeline exit point from Alberta at Empress. The benchmark index for United States natural gas prices is the market price as established by the New York Mercantile Exchange at Henry Hub (NYMEX), a major point of natural gas pipeline intersection in Louisiana. NYMEX is linked to AECO through transportation tariffs from the respective hubs to common markets and through foreign exchange rates. AECO prices averaged \$3.03/GJ throughout the first quarter of 2013 compared to \$2.03/GJ in the first quarter of 2012 and \$3.05/GJ in the fourth quarter of 2012. DeeThree's average realized natural gas price during the three-month period was \$3.43/mcf in the first quarter of 2013 versus \$2.17/mcf a year earlier and \$3.38/mcf in the fourth quarter of 2012.

Oil prices decreased in the first quarter of 2013 with West Texas Intermediate (WTI) averaging \$94.37/bbl compared to \$102.93/bbl in the same period of 2012 and \$88.18/bbl in the fourth quarter of 2012. The benchmark for crude oil prices in North America, and widely quoted globally, is WTI delivered to Cushing, Oklahoma, again as determined by the NYMEX. Canadian crude prices are based on refiner postings in Canadian dollars at Edmonton, Alberta and, as with natural gas, are linked to WTI through transportation tariffs to common markets and the foreign exchange rate. The average realized price of DeeThree's crude oil was \$73.46/bbl for the first quarter of 2013 compared to \$88.45/bbl a year earlier and \$74.86/bbl in the fourth quarter of 2012. Crude oil prices were down overall in 2013, as a result of widening Canadian crude differentials. The volatility in Canadian crude oil differentials is primarily attributed to increased North American oil production, refinery outages and pipeline infrastructure bottlenecks. DeeThree's realized prices for crude oil production are also affected by different quality adjustments in each of the Company's core operating areas. As the percentage of the Company's total oil production from each of those areas changes, the overall average realized price is affected. During the first quarter of 2013, the change in composition resulted in a greater price differential from WTI than in the prior quarter and the first quarter of 2012. Information regarding the Company's risk management program can be found in "Business Risks and Risk Mitigation" below.

## Royalties

Three Months Ended March 31,	2013	2012
	(\$)	(\$)
Oil and natural gas revenues (000s)	<b>30,490</b>	14,277
Total royalties (000s)	<b>6,441</b>	2,737
Total royalties (\$/boe)	<b>12.08</b>	9.89
Percent of revenue (%)	<b>21</b>	19

The Ferguson property is primarily subject to freehold royalties, which is a sliding-scale royalty determined monthly on a well-by-well basis using a calculation that is based on the New Alberta Crown Royalty 2009 with a cap of 30 percent. The sliding scale varies based on productivity (a higher royalty is payable from wells with higher production rates) and commodity prices (a higher royalty is payable in times of higher natural gas and crude oil prices).

The Brazeau property is primarily subject to Crown royalties payable to the provincial government and overriding royalties on oil, natural gas and NGLs production. These types of royalties are also sensitive to production levels and commodity prices; therefore, the Company's royalties will continue to fluctuate with commodity prices, well production rates, production declines of existing wells along with performance and location of new wells drilled.

For the first quarter of 2013, royalties totaled \$6,441,000 or 21 percent of revenue compared to \$2,737,000 or 19 percent of revenue for the same quarter in 2012 and \$5,735,000 or 20 percent of revenue in the fourth quarter of 2012. The year-over-year royalty rate change was partially due to new production from the Company's wells brought on-stream during the past year, some of which are subject to a freehold royalty based on the New Alberta Crown Royalty 2009, while others qualify for the 5 percent royalty holiday under the Government of Alberta royalty framework. The change was also partially related to an increase in the freehold mineral tax that the Company's Ferguson property is subject to, which has increased with the increased production from that area compared to the prior year.

## Operating and Transportation Expenses

Three Months Ended March 31,	2013	2012
(000s except per boe)	(\$)	(\$)
Operating expenses	<b>4,321</b>	4,288
Transportation expenses	<b>984</b>	445
Total operating and transportation expenses	<b>5,305</b>	4,733
Operating expenses (\$/boe)	<b>8.10</b>	15.49
Transportation expenses (\$/boe)	<b>1.84</b>	1.61
Total operating and transportation expenses (\$/boe)	<b>9.94</b>	17.10

Operating costs include all costs associated with the production of crude oil and natural gas. The major components of operating costs include charges for contract operating, processing fees, lease rentals, property and pipeline taxes, utilities and well maintenance charges.

Operating expenses for the first quarter of 2013 totaled \$4,321,000 or \$8.10/boe compared to \$4,288,000 or \$15.49/boe in the same period of 2012 and \$3,951,000 or \$8.05/boe in the fourth quarter of 2012. As production volumes increase, the Company has realized economies of scale at Ferguson and Brazeau, contributing to a lower operating cost per unit of production.

Transportation expenses for the three months ended March 31, 2013 were \$984,000 or \$1.84/boe compared to \$445,000 or \$1.61/boe in the first quarter of 2012 and \$893,000 or \$1.82/boe in the fourth quarter of 2012. Transportation expenses reflect NOVA and ATCO transportation costs and fluctuate depending on the proportion of the Company's natural gas that flows on firm service versus interruptible service (interruptible service is slightly more expensive) as well as the proportion of Company volumes on ATCO versus NOVA (ATCO is less expensive). Over the past year, the Company has increased production of crude oil and NGLs, and the transportation costs associated with those products consist primarily of pipeline tariffs, terminal charges and trucking (crude oil and NGLs incur a higher cost per boe for transportation than natural gas).

## Risk Management

The Company has elected not to use hedge accounting and, accordingly, the fair value of the financial contracts is recorded at each period-end. The fair value may change substantially from period to period depending on commodity and foreign exchange forward strip prices for the financial contracts outstanding at the balance sheet date. The change in fair value from period-end to period-end is reflected in the earnings for that period. As a result, earnings may fluctuate considerably based on the period-ending commodity and foreign exchange forward strip prices.

As at March 31, 2013, the Company had the following crude oil and foreign exchange risk management contracts with a total mark-to-market liability value of \$183,000:

Period	Commodity	Type of Contract	Quantity	Pricing Point	Contract Price
Jan. 1/13 – Dec. 31/13	Crude oil	Collar	250 bbls/d	WTI-NYMEX	US\$85.00/bbl (floor) – US\$111.00/bbl (cap) <sup>(1)</sup>
Jan. 1/13 – Dec. 31/13	Crude oil	Collar	250 bbls/d	WTI-NYMEX	US\$90.00/bbl (floor) – US\$113.25/bbl (cap) <sup>(2)</sup>
Jan. 1/13 – Dec. 31/13	Crude oil	Collar	250 bbls/d	WTI-NYMEX	US\$90.00/bbl (floor) – US\$116.25/bbl (cap) <sup>(3)</sup>
Jan. 1/13 – Dec. 31/13	Crude oil	Collar	250 bbls/d	WTI-NYMEX	US\$95.00/bbl (floor) – US\$118.00/bbl (cap) <sup>(4)</sup>
Jan. 1/13 – Dec. 31/13	Crude Oil	Collar	500 bbls/d	WTI-NYMEX	US\$90.00/bbl (floor) – US\$106.00/bbl (cap) <sup>(5)</sup>
May 1/13 – May 31/13	Crude Oil	Differential	500 bbls/d	EDMONTON SWEET	CAD\$2.65
May 1/13 – Dec. 31/13	Crude Oil	Fixed	500 bbls/d	WTI-NYMEX	CAD\$97.43/bbl

(1) Unless the monthly WTI price averages over US\$111.00/bbl every day for the entire month, in which case the cap becomes US\$90.00/bbl.

(2) Unless the monthly WTI price averages over US\$113.25/bbl every day for the entire month, in which case the cap becomes US\$92.00/bbl.

(3) Unless the monthly WTI price averages over US\$116.25/bbl every day for the entire month, in which case the cap becomes US\$92.00/bbl.

(4) Unless the monthly WTI price averages over US\$118.00/bbl every day for the entire month, in which case the cap becomes US\$100.00/bbl.

(5) Unless the monthly WTI price averages over US\$106.00/bbl every day for the entire month, in which case the cap becomes US\$90.00/bbl.

Period	Currency	Type of Contract	Quantity	Pricing Point (Cdn\$/US\$)
Jan.1/12 – Dec. 31/13	US\$	Average Rate Range Bonus Accumulator	US\$700,000	Target – \$1.10 Cdn\$/US\$ + \$1,000 bonus/day <sup>(1)</sup>
June 1/12 – Dec. 31/13	US\$	Average Rate Range Bonus Accumulator	US\$900,000	Target – \$1.0775 Cdn\$/US\$ + \$900 bonus/day <sup>(2)</sup>

(1) The Company can earn a bonus payout of up to \$1,000 per day depending on the period in which the exchange rate remains in the applicable range of equal to or greater than \$0.9350 and equal to or less than \$1.10.

(2) The Company can earn a bonus payout of up to \$900 day depending on the period in which the exchange rate remains in the applicable range of equal to or greater than \$0.9300 and equal to or less than \$1.0775.

These contracts are considered to be financial instruments and the resulting derivative financial asset was recorded on the Company's statement of financial position, with the unrealized loss being recorded on the statement of operations and comprehensive loss.

Three Months Ended March 31,	2013	2012
	(\$)	(\$)
Unrealized loss on financial instruments (000s)	<b>1,034</b>	1,829
Unrealized loss on financial instruments (\$/boe)	<b>1.94</b>	6.61

During the three months ended March 31, 2013, the Company also realized a gain on these financial instruments as a result of commodity prices and foreign exchanges rates in relation to the contract terms.

Three Months Ended March 31,	2013	2012
	(\$)	(\$)
Realized gain on financial instruments (000s)	<b>(116)</b>	(176)
Realized gain on financial instruments (\$/boe)	<b>(0.22)</b>	(0.64)

## G&A Expense

Three Months Ended March 31,	2013	2012
<i>(000s except per boe)</i>	(\$)	(\$)
Gross G&A expense	<b>2,113</b>	1,642
Capitalized G&A (direct)	<b>(461)</b>	(465)
Overhead recoveries	<b>(108)</b>	(123)
G&A expense (net)	<b>1,544</b>	1,054
G&A expense (net) (\$/boe)	<b>2.89</b>	3.81

Gross G&A expense totaled \$2,113,000 for the three-month period ended March 31, 2013 compared to \$1,642,000 in the comparable period of 2012 and \$2,466,000 in the fourth quarter of 2012. Net G&A costs were \$1,544,000 or \$2.89/boe in the first quarter of 2013 compared to \$1,054,000 or \$3.81/boe a year earlier and \$1,490,000 or \$3.04/boe in the fourth quarter of 2012. When compared to the same quarter of the prior year, gross G&A costs increased on an absolute basis due to increased staffing costs (including salaries, bonuses and office rent) associated with higher activity levels. In the first quarter of 2013, the Company had an average of 21 full-time employees and six consultants versus 13 full-time employees and two consultants in the same period of 2012.

The Company capitalized direct G&A expenses amounting to \$461,000 and had overhead recoveries of \$108,000 in the first quarter of 2013 versus \$465,000 and \$123,000, respectively, in the comparative period of 2012, and \$632,000 and \$302,000, respectively, in the fourth quarter of 2012. G&A expense per unit of production fell by 24% year-over-year due to the Company's significant production growth.

## Share-Based Compensation

Three Months Ended March 31,	2013	2012
<i>(000s except per boe)</i>	(\$)	(\$)
Gross share-based compensation	<b>614</b>	725
Share-based compensation reclassified to operating costs	<b>(20)</b>	(27)
Capitalized share-based compensation	<b>(194)</b>	(281)
Share-based compensation expense (net)	<b>400</b>	417
Share-based compensation expense (net) (\$/boe)	<b>0.75</b>	1.51

The Company has a stock option plan, which is described in note 10 to the unaudited interim financial statements for the three months ended March 31, 2013. Options granted under the plan have a four-year vesting term and expire five years from the grant date. The fair value of options granted is estimated at the grant date using the Black-Scholes option-pricing model. Share-based compensation expense is a non-cash expense that reflects the amortization over the vesting period of the fair value of stock options granted to the Company's employees, consultants and directors. For those stock options granted to field employees, their portion of the share-based compensation is reclassified to operating expenses to be consistent with the recognition of their salaries on the statement of operations and comprehensive loss.

For the quarter ended March 31, 2013, the Company incurred a net expense of \$400,000 or \$0.75/boe versus \$417,000 or \$1.51/boe in the same period of 2012 and \$416,000 or \$0.85/boe in the fourth quarter of 2012.

### Depletion and Depreciation (D&D)

Three Months Ended March 31,	2013	2012
	(\$)	(\$)
D&D provision (000s)	<b>10,315</b>	5,952
D&D provision (\$/boe)	<b>19.34</b>	21.50

D&D is computed on a unit-of-production basis. Such expense, on a boe basis, fluctuates from period to period primarily as a result of changes in the underlying proved plus probable reserves base and in the amount of costs subject to D&D, including future development costs. Such costs are segregated and depleted on an area-by-area basis relative to the respective underlying proved plus probable reserves base.

Depreciation is provided on certain field facilities using the straight-line method over a 20-year useful life and on office assets using the declining balance method at rates of 20-30 percent.

The Company's D&D expense for the three months ended March 31, 2013 was \$10,315,000 or \$19.34/boe compared to \$5,952,000 or \$21.50/boe in the comparable period of 2012 and \$9,786,000 or \$19.94/boe in the fourth quarter of 2012. Depletion and depreciation expense for the first quarter of 2013 increased over the same period of 2012 primarily due to higher production volumes and an increase in the rate per barrel as a result of higher estimated future development costs of the Ferguson and Brazeau properties. The future development costs are a key element of the rate determination.

The year-over-year absolute increase was attributable to the increased value of the proved plus probable reserves added during 2012 from the Company's drilling program, increased production related to those assets and related future development costs. However, the year-over-year per unit amounts decreased due to the fact that successful 2012 and 2013 wells were added to the asset base at a lower cost per boe of new reserves than the assets purchased in the March 2011 acquisition, which contributes to a lower D&D rate overall.

### Exploration and Evaluation (E&E) Expense

Three Months Ended March 31,	2013	2012
	(\$)	(\$)
E&E expense (000s)	<b>4,722</b>	1,132
E&E expense (\$/boe)	<b>8.85</b>	4.09

Under IFRS, DeeThree accumulates those costs related to E&E assets in one cost pool, pending determination of technical feasibility and commercial viability of the asset. E&E costs are primarily for seismic data, undeveloped land and drilling until the well in question is complete and results have been evaluated. Costs related to wells determined to be uneconomical as well as costs of undeveloped land lease expiries are expensed as they occur.

During the first quarter of 2013, the Company recorded E&E expense of \$4,722,000 or \$8.85/boe, which included \$121,000 related to lease expiries in several of the Company's areas, \$3,305,000 related to a dry and abandoned well drilled during Q1 as well as a \$1,296,000 write-off of preliminary drilling costs related to a well drilled in 2012 which has now been deemed unsuccessful. The Company recorded E&E expense of \$1,132,000 or \$4.09/boe in the same period of 2012, and \$323,000 or \$0.66/boe in the fourth quarter of 2012 related to lease expiries.

## Accretion and Finance Expenses

Three Months Ended March 31,	2013	2012
<i>(000s except per boe)</i>	<i>(\$)</i>	<i>(\$)</i>
Accretion expense on decommissioning liabilities	<b>79</b>	95
Finance expense	<b>548</b>	215
Total accretion and finance expenses	<b>627</b>	310
Accretion expense on decommissioning liabilities <i>(\$/boe)</i>	<b>0.15</b>	0.34
Finance expense <i>(\$/boe)</i>	<b>1.03</b>	0.78
Total accretion and finance expenses <i>(\$/boe)</i>	<b>1.18</b>	1.12

Accretion expense represents the increase in the present value of the Company's decommissioning liabilities. In the first quarter of 2013, the Company recorded accretion expense of \$79,000 or \$0.15/boe compared to \$95,000 or \$0.34/boe in the same period of 2012 and \$80,000 or \$0.16/boe in the fourth quarter of 2012. The absolute decrease is a function of several things: first, as accretion is not a unit-based calculation, increased production volumes have spread the expense over a larger number of barrels; second, during the year the Company revised the discount rate used to calculate the liability from 3.5 percent to 2.25 percent based on estimated market interest rates. The underlying liability may increase over time based on new obligations incurred from drilling wells, constructing facilities, acquiring operations, adjusting future estimates of timing or estimated decommissioning costs. The liability can also be reduced as a result of abandonment work actually completed.

During the three months ended March 31, 2013, the Company recorded finance expenses of \$548,000 or \$1.03/boe compared to \$215,000 or \$0.78/boe in the same period of 2012 and \$680,000 or \$1.39/boe in the fourth quarter of 2012. The Company incurred interest charges and standby fees related to the \$90,000,000 credit facility (2012 – \$20,000,000), which was drawn to \$45,763,000 at the end of the period.

## Income Taxes

Three Months Ended March 31,	2013	2012
	<i>(\$)</i>	<i>(\$)</i>
Deferred income tax expense (recovery) <i>(000s)</i>	<b>845</b>	(512)
Deferred income tax expense (recovery) <i>(\$/boe)</i>	<b>1.58</b>	(1.85)

During the first quarter of 2013, the Company recorded a deferred income tax expense of \$845,000 or \$1.58/boe compared to a recovery of \$512,000 or \$1.85/boe in same period of 2012 and expense of \$1,303,000 or \$2.66/boe in the fourth quarter of 2012. The first quarter expense was primarily related to an increase in the taxable base of the oil and natural gas assets. The movement in the taxable base of oil and natural gas assets is due to the Company's capital spending associated with flow-through shares. As costs are incurred, the Company reverses the flow-through share liability and recognizes the deferred income tax expense at that time. During the three months ended March 31, 2013, the Company spent approximately \$7,174,000 in eligible capital expenditures related to the March 2012 issuance of flow-through shares.

DeeThree does not have current income taxes payable and does not expect to pay current income taxes in 2013 as the Company had estimated tax pools available at March 31, 2013 of \$302,000,000.

## Funds from Operations

Three Months Ended March 31,	2013	2012
(000s)	(\$)	(\$)
Net loss	<b>(627)</b>	(3,199)
Non-cash items:		
D&D	<b>10,315</b>	5,952
Deferred income tax (recovery)	<b>845</b>	(512)
Share-based compensation <sup>(1)</sup>	<b>420</b>	444
Accretion	<b>79</b>	95
Unrealized loss on financial instruments	<b>1,034</b>	1,829
E&E expense	<b>4,722</b>	1,132
Funds from operations	<b>16,788</b>	5,741

(1) The share-based compensation amount included in the calculation of funds from operations has been adjusted for the non-cash portion related to certain field employees that was reclassified to operating expenses for presentation in the statement of operations and comprehensive income (loss).

During the three months ended March 31, 2013, the Company generated funds from operations totaling \$16,788,000 or \$0.23 per basic and diluted share compared to \$5,741,000 or \$0.09 per basic and diluted share in the comparative period of 2012 and \$16,231,000 or \$0.23 per basic share and \$0.22 per diluted share in the fourth quarter of 2012. This 192 percent year-over-year increase was primarily due to increased revenue from increased production, which was partially offset by increased royalties.

## Net Loss

For the three months ended March 31, 2013, the Company recorded net loss of \$627,000 or \$0.01 per basic and diluted share compared to a net loss of \$3,199,000 or \$0.05 per basic and diluted share in the same period of 2012 and net income of \$3,483,000 or \$0.05 per basic and diluted share in the fourth quarter of 2012. The Company's net loss for the quarter was primarily due to an increased E&E expense relating to the write-off of capital costs for one dry and abandoned well drilled in the period and one previously drilled well that was deemed to be unsuccessful.

## Netbacks (per unit)

Three Months Ended March 31,	2013	2012
	(\$/boe)	(\$/boe)
Average sales price	<b>57.17</b>	51.58
Royalties	<b>(12.08)</b>	(9.89)
Operating	<b>(8.10)</b>	(15.49)
Transportation	<b>(1.84)</b>	(1.61)
Operating netback <sup>(1)</sup>	<b>35.15</b>	24.59
G&A and other expense (excludes non-cash items)	<b>(2.89)</b>	(3.81)
Realized gain on financial instruments	<b>0.22</b>	0.64
Finance expenses	<b>(1.03)</b>	(0.78)
Funds flow netback <sup>(1)</sup>	<b>31.45</b>	20.64
D&D expense	<b>(19.34)</b>	(21.50)
Accretion	<b>(0.15)</b>	(0.34)
Share-based compensation	<b>(0.75)</b>	(1.51)
Unrealized loss on financial instruments	<b>(1.94)</b>	(6.61)
E&E expense	<b>(8.85)</b>	(4.09)
Deferred income tax recovery (expense)	<b>(1.58)</b>	1.85
Net loss netback <sup>(1)</sup>	<b>(1.16)</b>	(11.56)

(1) Non-IFRS measure; refer to the commentary at the beginning of this MD&A. Operating netback, funds flow netback and net loss netback are calculated by dividing operating income, funds flow from operations and net loss by the sales volume in boe for the period then ended. For a description of the boe conversion ratio, refer to "Other Measurements" at the beginning of this MD&A.

The operating netback was \$35.15/boe for the three months ended March 31, 2013 compared to \$24.59/boe in the same period of 2012 and \$36.27/boe in the fourth quarter of 2012. As compared to the prior year's first quarter, the Company experienced a higher realized average price throughout the three months ended March 31, 2013. Even though both the crude oil and NGLs had a lower realized price per barrel in the period than in the same period of 2012, the higher realized average price and resulting higher netback was largely the result of a shift to a proportionately higher oil production base, which attracts higher pricing. The improved netback was also positively affected by decreased operating costs during the quarter.

## Investment and Investment Efficiencies

### Capital Expenditures and Acquisitions

Three Months Ended March 31,	2013	2012
<i>(000s)(excluding decommissioning liabilities and capitalized share-based compensation)</i>	(\$)	(\$)
Property acquisitions and adjustments	<b>2,130</b>	–
Drilling and completions	<b>30,524</b>	30,227
Equipment and facilities	<b>4,494</b>	2,398
Land and lease retention	<b>3,939</b>	3,488
Geological and geophysical	–	122
Capitalized G&A and other	<b>471</b>	480
Total capital expenditures	<b>41,558</b>	36,715
Farm-out proceeds	–	(1,000)
Total capital expenditures, net of farm-out proceeds	<b>41,558</b>	35,715

During the first quarter of 2013, the Company incurred a total of \$41,558,000 (2012 – \$36,715,000) in capital expenditures, excluding the non-cash decommissioning liabilities and capitalized share-based compensation. During the period, the Company spent \$2,130,000 (2012 – \$nil) to complete an acquisition for additional working interest in the Peace River Arch area. With the Company's focus on drilling in the Ferguson and Brazeau areas, drilling and completion expenditures totaled \$30,524,000 in the first quarter of 2013 (2012 – \$30,227,000), including the drilling of 8 gross (7.19 net) wells. In the comparative quarter of 2012, the Company drilled 10 gross (9.1 net) wells and incurred significant completion expenditures. For the three months ended March 31, 2013, DeeThree spent \$4,494,000 (2012 – \$2,398,000) on tie-ins and facilities, which in 2013 consisted primarily of expenditures related to tie-in of the 2013 wells drilled as well as continued construction of an amine plant and two oil battery sites at Ferguson. The Company spent \$3,939,000 in the first quarter of 2013 (2012 – \$3,488,000) on Crown land sales and did not incur any expenses related to seismic programs (2012 – \$122,000). The remaining \$471,000 in the first quarter of 2013 (2012 – \$480,000) was invested in capitalized G&A and other corporate assets.

## Drilling Activity

	Exploration		Developed		Total

Average working interest (%)		100		90		91

During the first quarter of 2013, DeeThree drilled 6.0 gross (5.9 net) on its Brazeau property, 1.0 gross (1.0 net) Bakken wells on its Ferguson property and 1.0 gross (0.29 net) non-operated well in the Peace River Arch area with an 88 percent success rate. One of the quarter's oil wells was abandoned due to a high pressure water zone that was encountered during the drilling process. During the three months ended March 31, 2012, the Company drilled 10.0 gross (9.1 net) wells for a 100 percent success rate, including 3.0 gross (2.8 net) horizontal Belly River wells in the Brazeau area, 6.0 gross (6.0 net) Bakken wells and 1.0 gross (0.3 net) wells in the Peace River Arch area.

## Liquidity and Capital Resources

### Working Capital

The following table summarizes the change in working capital during the three months ended March 31, 2013 and the year ended December 31, 2012:

	<b>Three Months Ended March 31, 2013</b>	Year Ended December 31, 2012
(000s)	(\$)	(\$)
Working capital deficit – beginning of period	<b>(77,586)</b>	(16,901)
Abandonment and reclamation costs	<b>(67)</b>	(108)
Funds from operations	<b>16,788</b>	46,088
Issuance of capital stock for cash (net of share issuance costs)	<b>32,249</b>	37,088
Capital expenditures	<b>(39,428)</b>	(137,289)
Acquisitions	<b>(2,130)</b>	(7,464)
Farm-out proceeds	-	1,000
Working capital deficit – end of period	<b>(70,174)</b>	(77,586)

DeeThree entered 2013 with a working capital deficit of \$77,586,000. During the first quarter, the Company issued 5,083,000 common shares at a price of \$6.80 per common share for total gross proceeds of \$34,564,000 (\$32,234,000 net of estimated share issuance costs). Also in the first quarter, the Company issued 4,572 common shares on the exercise of options for total cash proceeds of \$15,000. In Q1 2013 the Company generated funds from operations of \$16,788,000 and invested \$39,428,000 in capital expenditures and \$2,130,000 in acquisitions for total capital spending of \$41,558,000. DeeThree exited the first quarter of 2013 with a working capital deficit of \$70,174,000.

At March 31, 2013, the Company had a revolving demand credit facility with an authorized borrowing base of \$90,000,000 with interest charged at a rate per annum equal to the Canadian prime rate during the period in question, plus the applicable margin, being a range of 0.50 percent to 2.50 percent, as determined by the Company's debt to cash flow ratio. Standby fees associated with this facility are charged based on an applicable margin, being a range of 0.2 percent to 0.45 percent per annum on the undrawn portion of the facility, again based on the Company's debt to cash flow ratio. Under this credit facility, the Corporation is required to maintain a current ratio of not less than 1:1. Subsequent to the quarter end, the Company increased the revolving demand credit facility to an authorized borrowing base of \$135,000,000. The increase was finalized on April 30, 2013.

As at March 31, 2013, \$45,763,000 was drawn against the facility. Collateral for this facility consists of a general security agreement, providing a security interest over all present and subsequently acquired personal property, and a floating charge on all present and subsequently acquired land interests of the Company. The facility is a subject to semi-annual review by the Company's lender, with the next review scheduled for later in the spring of 2013.

DeeThree expects to fund future capital expenditures with its funds from operations and the unused demand credit facility.

## Related-Party Transactions and Off-Balance-Sheet Transactions

The Company had the following related-party transactions during the year ended March 31, 2013:

The Company has retained a law firm to provide legal services. The Corporate Secretary of DeeThree is a partner of this firm. During the period ended March 31, 2013, the Company incurred \$144,000 with the firm (2012 – \$161,000), included in general and administrative expenses and share issuance costs, of which \$98,000 remained in accounts payable at March 31, 2013 (March 31, 2012 – \$94,000). Services provided related to advice and counsel primarily in the areas of general legal, corporate governance and banking matters. The Company expects to continue using this firm in 2013.

All related-party transactions were in the normal course of operations and have been measured at exchange amounts established and agreed to by the related parties and which are similar to those that the Company would expect to have negotiated with unrelated third parties in similar circumstances.

There were no off-balance-sheet transactions entered into during the period nor are there any outstanding as at the date of this MD&A.

## Contractual Obligations and Commitments

Years Ended December 31,	2013	2014	2015	2016+	Total
(000s)	(\$)	(\$)	(\$)	(\$)	(\$)
Operating lease – office	480	640	640	160	1,920
Operating lease – equipment	164	47	–	–	211
Exploration expenditures (flow-through)	11,879	–	–	–	11,879
Drilling contracts	3,762	587	–	–	4,349
Bank debt	45,763	–	–	–	45,763
<b>Total</b>	<b>62,048</b>	<b>1,274</b>	<b>640</b>	<b>160</b>	<b>64,122</b>

As at March 31, 2013, the Company had contractual obligations for its office leases totaling approximately \$1,920,000 to March 2016. The head office lease obligations are comprised of the lease payments as well as parking and an estimate of occupancy costs of the Company's head office space. The Company also had contractual obligations for several vehicles and equipment totaling approximately \$211,000 to May 2014.

In connection with the issuance of flow-through shares by the Company during the first quarter of 2012, DeeThree is required to spend \$17,253,450 of eligible exploration expenditures by December 31, 2013. As at March 31, 2013, \$10,379,450 of these have been incurred. The remaining \$6,874,000 will be incurred during 2013. These expenditures were renounced to shareholders in January 2013 effective December 31, 2012.

In connection with the Company's issuance of flow-through shares during the fourth quarter of 2012, DeeThree is required to spend an additional \$5,005,000 of eligible exploration expenditures by December 31, 2013. As at March 31, 2013, \$nil of these expenditures had been incurred. These expenditures will be incurred during 2013 and were renounced to shareholders in January 2013 effective December 31, 2012.

DeeThree has two contracts for drilling rig services under which the Company is committed to using services totaling \$4,349,000 extending into late 2013.

At March 31, 2013, the Company also had the obligation to repay the amount outstanding on the revolving demand credit facility, which was drawn to \$45,763,000 at period-end.

During 2012, DeeThree entered into a farm-in agreement with a senior oil and natural gas producer pursuant to which it may earn 100 percent working interest in up to 34 additional sections of Belly River petroleum and natural gas rights directly offsetting DeeThree's Brazeau property. DeeThree is committed to drilling a minimum of three horizontal wells on the farm-in lands, with a continuing rolling option thereafter in return for a 15 percent non-convertible overriding royalty. As of the date of this MD&A, the Company has drilled two of the horizontal wells related to this commitment.

## Share Capital

As at May 13, 2013, the Company had 76,367,511 common shares outstanding and 6,699,294 stock options outstanding.

(1) The selected quarterly information was prepared in accordance with the accounting principles described in the notes to the financial statements, except for funds from (used in) operations, which is not prescribed under IFRS.

(2) Total capital expenditures, including acquisitions.

(3) Current assets less current liabilities, excluding current derivative financial instruments.

## Factors That Have Caused Variations over the Quarters

For the quarter ended March 31, 2013, the Company achieved an improved operating netback of \$35.15/boe, which was attributable to several factors. First, with a revised production split of 71 percent oil and NGLs and average production of 5,926 boe per day, the average realized price was \$57.17/boe. The Company also achieved a decrease in operating costs per barrel, both as a function of economies of scale from increased production and from operational improvements, including expanding the oil battery and other infrastructure owned and used at Ferguson. The higher netbacks contributed to the \$16,788,000 in funds from operations recorded for the period.

During 2012, the Company was successful with an active drilling program primarily at the Ferguson and Brazeau properties. Capital expenditures of \$144,753,000 resulted in 30 gross (28.8 net) wells drilled. This contributed to a 122 percent year-over-year volume increase and a production split of 35 percent natural gas and 65 percent oil and NGLs for the year.

Please refer to “Financial and Operating Results” and other sections for detailed discussions on variations during the comparative quarters and to DeeThree’s previously issued interim and annual MD&A for changes in prior quarters.

## Critical Estimates

The preparation of the Company’s interim financial statements requires management to adopt accounting policies that involve the use of significant estimates and assumptions. They are developed based on the best available information and are believed by management to be reasonable under the existing circumstances. New events or additional information may result in the revision of these estimates over time. The following discussion outlines some of the accounting policies and practices that are critical to determining DeeThree’s financial results. A summary of the critical estimates and judgements used by DeeThree can be found in note 2 to the audited financial statements for the year ended December 31, 2012.

### Reserves Determination

The proved natural gas, crude oil and NGLs reserves that are used in determining DeeThree’s depletion rates, the magnitude of the borrowing base available to the Company from its lender and the impairment test are based on management’s best estimates, and are subject to uncertainty. Through the use of geological, geophysical and engineering data, the reservoirs and deposits of natural gas, crude oil and NGLs are examined to determine quantities available for future production, given existing operations and economic conditions and technology. The evaluation of reserves is an ongoing process influenced by current production, continuing development activities and changing economic conditions as reflected in natural gas and crude oil prices. Consequently, the reserves are estimated, and the estimates are subject to variability. To assist with the reserves evaluation process, the Company utilizes independent oil and natural gas reservoir engineers.

### Income Taxes

The determination of DeeThree’s income and other tax liability requires interpretation of complex laws and regulations often involving multiple jurisdictions. All tax filings are subject to audit and potential reassessment after lapse of considerable time. Accordingly, the actual income tax liability may differ significantly from the liability estimated or recorded.

### Other Estimates

The accrual method of accounting will require management to incorporate certain estimates, including revenues, royalties, production costs and capital expenditures as at a specific reporting date but for which actual revenue and royalties have not yet been received, and estimates on capital projects that are in progress or recently completed where actual costs have not been received at a specific reporting date.

### New Accounting Pronouncements

Effective January 1, 2013, the Company has adopted the revised standards and amendments as disclosed in note 3 of the interim financial statements for the period ended March 31, 2013. The applicability of these standards and amendments were not significant to the Company’s interim financial statements.

## Controls and Procedures

### Disclosure Controls

Disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company is accumulated and communicated to management (including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO) to allow timely decisions regarding required disclosure. DeeThree's CEO and CFO have concluded, based on their evaluation as of the end of the period covered by the Company's interim filings, that the Company's disclosure controls and procedures are effective to provide reasonable assurance that material information related to the issuer is made known to them by others within the Company.

### Internal Controls over Financial Reporting

Management has assessed the effectiveness of the Company's internal controls over financial reporting as defined by National Instrument (NI) 52-109 – "Certification of Disclosure in Issuers' Annual and Interim Filings". Management concluded that the Company's internal controls over financial reporting were effective as of December 31, 2012. No changes were made to the Company's internal controls over financial reporting during the period ended March 31, 2013 that have materially affected, or are reasonably likely to materially affect, internal controls over financial reporting.

It should be noted that while DeeThree's CEO and CFO believe that the Company's internal controls and procedures provide a reasonable level of assurance and are effective, they do not expect that these controls will prevent all errors or fraud. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

## Business Risks and Risk Mitigation

### Overall

DeeThree's exploration and production activities are concentrated in the Western Canada Sedimentary Basin where the industry is very competitive. There are a number of risks facing participants in the oil and natural gas industry, some of which are common to all businesses, while others are specific to the sector. These include risks such as finding and developing oil and natural gas reserves economically, estimating reserves, producing the reserves in commercial quantities, finding a suitable market at attractive commodity prices, financial and liquidity risks, and environmental and safety risks.

DeeThree's future oil and natural gas reserves and production and, therefore, its cash flows, will be highly dependent on the Company's success in exploiting its reserves base and acquiring additional reserves. The Company mitigates the risk of finding and developing economical oil and natural gas reserves by utilizing a team of highly qualified professionals with expertise and experience in these areas. DeeThree attempts to maximize drilling success by exploring areas that have multi-zone horizons, targeting deeper horizons with uphole potential, continuously assessing new acquisition opportunities to complement existing activities and balancing higher-risk exploratory drilling with lower-risk development drilling.

Beyond exploration risk, there is the potential that the Company's natural gas and crude oil reserves may not be economically produced at prevailing prices. DeeThree minimizes this risk by generating exploration prospects internally, targeting high-quality projects, operating the project, and by attempting to access sales markets through Company-owned infrastructure or mid-stream operators.

### Reserves Estimates

DeeThree has retained an independent engineering consulting firm that assists the Company in evaluating oil and natural gas reserves. Reserve values are based on a number of variable factors and assumptions such as commodity prices, projected production, future production costs and governmental regulation. The reserves and recovery information contained in the independent reserves evaluation is an estimate. The actual production and ultimate reserves from the properties may be greater or less than the estimates prepared by the independent reserves evaluator.

## Volatility of Oil and Natural Gas Prices

The Company's operational results and financial condition depend on the prices received for oil and natural gas production. Natural gas prices have increased in 2013 from 2012 and differentials on Canadian crude oil widened significantly in 2013 and 2012 due to pipeline and infrastructure constraints. There are numerous projects proposed to alleviate pipeline bottlenecks into and in the United States, expand refinery capacity and expand or build new pipelines in Canada and the United States to source new markets, many of which are in the regulatory application phase. There can be no assurance that such regulatory approvals will be secured on a timely basis or at all. Oil and natural gas prices are determined by economic and, in some circumstances, political factors. Supply and demand factors, including weather and general economic conditions as well as conditions in other oil and natural gas regions, influence prices. DeeThree is exposed to commodity price risk whereby the fair value of future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for petroleum and natural gas are affected by not only the relationship between the Canadian and United States dollars, but also global economic events that dictate the levels of supply and demand. The Company protects itself from fluctuations in prices by maintaining an appropriate hedging strategy. As at the date of this MD&A, DeeThree has eight crude oil hedges in place (see "Commodity Prices and Foreign Exchange"). Most commodity prices are based on U.S. dollar benchmarks, which result in the Company's realized prices being influenced by the Canadian/U.S. exchange rates. The Company does not sell or transact in foreign currency, but may be impacted by foreign currency exchange rate changes related to commodity prices as outlined above. At the date of this MD&A, DeeThree had two foreign currency exchange risk management contracts in place.

## Counterparty Risk

Credit risk is the risk of a counterparty failing to meet its obligations in accordance with the agreed upon terms. The Company may be exposed to third-party credit risk through its contractual arrangements with its current or future joint venture partners, marketers of its commodities and other parties. DeeThree has established credit policies and controls designed to mitigate the risk of default or non-payment with respect to oil and natural gas sales, financial hedging transactions and joint venture participants. The Company makes every effort to sell its commodities to major companies with excellent credit ratings.

## Access to Capital

The oil and natural gas industry is a very capital-intensive industry, and in order to fully realize the Company's strategic goals and business plans, DeeThree will rely on equity markets as a source of new capital in addition to bank financing and internally generated cash flow to fund its ongoing capital investments. DeeThree's ability to raise additional capital will depend on a number of factors such as general economic and market conditions that are beyond the Company's control. Internally generated funds will also fluctuate with changing commodity prices. DeeThree currently has a \$135,000,000 syndicated facility with two banks. The Company is required to comply with covenants under this facility and in the event it does not comply, access to capital could be restricted or repayment could be required. DeeThree routinely reviews the covenants based on actual and forecast results and has the ability to make changes to development plans to comply with the covenants under the credit facility. DeeThree anticipates it will continue to have adequate liquidity to fund its financial liabilities through its future funds from operations and available bank credit. DeeThree is committed to maintaining a strong balance sheet along with an adaptable capital expenditure program that can be adjusted to capitalize on, or reflect, acquisition opportunities and, if necessary, a tightening of liquidity sources. From its founding to the date of this MD&A, DeeThree has had no defaults or breaches on its bank debt or any of its financial liabilities.

## Operational Matters

The operation of oil and natural gas wells involves a number of operating and natural hazards that may result in blowouts, environmental damage and other unexpected or dangerous conditions resulting in damage to DeeThree and possible liability to third parties. DeeThree has established an environmental, health and safety program and has updated its operational emergency response plan and operational safety manual to address these operational issues. DeeThree maintains a comprehensive insurance plan, which includes liability insurance, where available, in amounts consistent with industry standards as well as business interruption insurance for selected facilities, to the extent that such insurance is available, to mitigate risks and protect against significant losses where possible. DeeThree operates in accordance with all applicable environmental legislation and strives to maintain compliance with such regulations.

In addition, DeeThree is also subject to other risks and uncertainties which are described in the Company's Annual Information Form dated March 28, 2013.

## Outlook

On April 24, 2013 we announced an increase to our 2013 guidance. Our forecasted 2013 capital expenditures increased to \$160 million from \$150 million and, as described above, increased our 2013 average and exit production guidance. We continue to protect our future cash flow through the use of financial hedges and year to date we have hedged an additional 1,000 bbls/d of crude oil at a fixed price of WTI-NYMEX \$97.43 CAD for 500 bbl/d (May, 2013 – December, 2013) and WTI-NYMEX \$95.03 CAD for 500 bbl/d (June, 2013 – December, 2013). We also locked in the crude oil differential on 500 bbls/d for May 2013 at \$2.65 CAD Edmonton sweet.

With a strong balance sheet and the continued positive results from its Brazeau Belly River and Ferguson Alberta Bakken properties, DeeThree is well positioned to achieve our objectives for 2013.

# NOTES TO THE FINANCIAL STATEMENTS

As at and for the period ended March 31, 2013

(unaudited)

## 1. Reporting Entity

DeeThree Exploration Ltd. (“DeeThree” or the “Company”) is a publicly traded company incorporated under the laws of Alberta. The Company is principally engaged in the exploration for and exploitation, development and production of oil and natural gas, and conducts many of its activities jointly with others. These financial statements reflect only the Company's interests in such activities. DeeThree is registered and domiciled in Canada. Its main office is at Suite 2200, 520 Third Avenue S.W., Calgary, Alberta.

## 2. Basis of Presentation

### (a) Statement of Compliance

These interim financial statements for the three months ended March 31, 2013 were prepared in accordance with International Financial Reporting Standards and interpretations (collectively referred to as IFRS) as issued by the International Accounting Standards Board (IASB).

The interim financial statements should be read in conjunction with the Company's audited annual financial statements for the year ended December 31, 2012.

The interim financial statements were authorized for issuance by the Board of Directors on May 13, 2013.

## 3. Significant Accounting Policies

The Company's accounting policies are described in Note 3 to the December 31, 2012 audited annual financial statements. Those accounting policies have been applied consistently to all periods presented in these interim financial statements with the exception of adoption of the following new standards and interpretations effective as of January 1, 2013:

### **Fair Value Measurement**

*IFRS 13 Fair Value Measurement* – establishes a single framework for fair value measurement and disclosures when fair value is required or permitted under IFRS. Adoption of the standard did not require adjustments to the valuation techniques used by the Company to measure fair value and did not result in any measurement adjustments as at January 1, 2013. This standard had no material impact on the Company's financial position or performance.

### **Joint Arrangements**

*IFRS 11 Joint Arrangements* – establishes the accounting principles for parties to a joint arrangement and replaces IAS 31 *Interest in Joint Ventures* and SIC-13 *Jointly Controlled Entities: Non-Monetary Contributions by Venturers*. This standard requires a party to assess its rights and obligations from the arrangement in order to determine whether a joint arrangement represents a joint venture or a joint operation. As at December 31, 2012, the Company proportionately consolidated all its interest in joint arrangements. This standard had no material impact on the Company's financial position or performance.

### **Offsetting Financial Assets and Financial Liabilities**

*IFRS 7 Disclosures - Offsetting Financial Assets and Financial Liabilities - Amendments to IFRS* - These amendments to IFRS 7 introduce new disclosure requirements about the effects of offsetting financial assets and financial liabilities and related arrangements on an entity's financial position. The disclosures will provide users with information that may be useful in evaluating the effect of any netting arrangements in an entity's financial position. The amendments to IFRS 7 are effective for annual periods beginning on or after January 1, 2013. As the Company is not netting any significant amounts related to financial instruments in accordance with IAS 32 and does not have significant offsetting arrangements, the amendment does not have an impact on the Company.

## 4. Acquisitions

During the first quarter of 2013, the Company acquired interests in producing oil and natural gas assets principally located in the Peace River Arch area of Alberta for total consideration of \$2,130,000. The property acquisition closed on January 18, 2013 and was accounted for as a business combination under IFRS 3 – “Business Combinations”. Acquisition costs of \$5,000 were charged to general and administrative expense on the statement of income and comprehensive income. Had the acquisition closed January 1, 2013, the Company estimates that its pro forma revenue and net loss for the period would not have been significantly impacted.

(000s)	(\$)
<b>Net assets acquired</b>	
Petroleum and natural gas assets	1,873

### (a) Capitalization of General and Administrative and Share-Based Compensation Expenses

During the period ended March 31, 2013, approximately \$145,000 of directly attributable general and administrative expense and \$65,000 of directly attributable share-based compensation expense were capitalized as expenditures on property and equipment (year ended December 31, 2012 – \$516,000 and \$372,000, respectively).

### (b) Amortization and Impairment Charges

For the period ended March 31, 2013, management determined that no impairment indicators were present and as such, did not perform an impairment test.

### (c) Future Development Costs and Salvage Value

During the three months ended March 31, 2013, an estimated \$125,600,000 of future development costs associated with proved plus probable undeveloped reserves were included in the calculation of depletion and depreciation expense and an estimated \$13,157,000 of salvage value of production equipment was excluded (year ended December 31, 2012 – \$158,947,000 and \$13,157,000, respectively).

## 7. Bank Debt

At March 31, 2013, the Company had a revolving demand credit facility with an authorized borrowing base of \$90,000,000 with interest charged at a rate per annum equal to the Canadian prime rate during said period plus the applicable margin, being a range of 0.50 percent to 2.50 percent, as determined by the Corporation's debt to cash flow ratio. Standby fees associated with this facility are charged based on an applicable margin, being a range of 0.2 percent to 0.45 percent per annum on the undrawn portion of the facility, again based on the Company's debt to cash flow ratio. Under this credit facility, the Corporation is required to maintain a current ratio of not less than 1:1.

Subsequent to March 31, 2013, the Company increased the revolving demand credit facility to an authorized borrowing base of \$135,000,000 with the same terms as the borrowing base at the quarter end. This increase was finalized on April 30, 2013.

At March 31, 2013, \$45,763,000 (December 31, 2012 – \$63,104,000) was drawn against the revolving demand credit facility. The amount of the facility is subject to a borrowing base test performed on a periodic basis by the lenders, based primarily on reserves and using commodity prices estimated by the lenders as well as other factors. The borrowing base of the credit facility is subject to review at least semi-annually with the next review to take place in the fall of 2013. A decrease in the borrowing base could result in a reduction to the credit facility. Collateral for this facility consists of a general security agreement, providing a security interest over all present and subsequently acquired personal property and a floating charge on all present and subsequently acquired land interests of the Company.

## 8. Decommissioning Liabilities

The Company has estimated the net present value of decommissioning obligations to be \$14,482,000 as at March 31, 2013 (December 31, 2012 – \$13,982,000) based on an undiscounted total future liability of \$18,244,000 (December 31, 2012 – \$17,642,000). These payments are expected to be incurred over a period of one to 20 years with the majority of costs to be incurred between 2013 and 2027. At March 31, 2013, a risk-free rate of 2.25 percent (December 31, 2012 – 2.25 percent) and an inflation rate of 2 percent (December 31, 2012 – 2 percent) were used to calculate the net present value of the decommissioning liabilities.

#### (i) Common Share Issuances

In February 2013, DeeThree issued 4,420,000 common shares at a price of \$6.80 per common share for total gross proceeds of \$30,056,000 (\$28,042,000 net of estimated share issuance costs). In March 2013, DeeThree also issued 663,000 common shares at a price of \$6.80 per common share for total gross proceeds of \$4,508,400 (\$4,192,000 net of estimated share issuance costs) on the exercise in full of the underwriters' over-allotment option from the February issuance.

In October 2012, DeeThree issued 3,139,500 common shares at a price of \$5.50 per common share, for total gross proceeds of \$17,267,250 (\$16,008,500 net of share issuance costs), including 409,500 common shares (\$2,252,250) issued on exercise in full of the underwriters' over-allotment option.

#### (ii) Flow-Through Share Issuances

In October 2012, DeeThree issued 770,000 flow-through shares at a price of \$6.50 per flow-through share for total gross proceeds of \$5,005,000 (\$4,650,000 net of share issuance costs). The implied premium on the flow-through shares of \$1.00 per share or \$770,000 was initially recorded as a liability on the statement of financial position, and \$770,000 remains at December 31, 2012. To date, the Company has incurred \$nil of the total \$5,005,000 of qualified exploration and development expenditures, with the full amount to be spent by December 31, 2013.

In March 2012, DeeThree issued 3,834,100 flow-through shares at a price of \$4.50 per flow-through share for total gross proceeds of \$17,253,450 (\$16,012,450 net of share issuance costs), including 500,100 flow-through shares (\$2,250,450) issued on the exercise in full of the underwriters' over-allotment option. The implied premium on the flow-through shares of \$0.70 per share or \$2,683,870 was initially recorded as a liability on the statement of financial position and \$2,185,000 remains at December 31, 2012. To date, the Company has incurred \$10,379,450 of the total \$17,253,450 of qualified exploration and development expenditures and the remainder will be spent by December 31, 2013.

#### (iii) Exercising of Options

In January 2013, 4,572 options were exercised at a weighted average price of \$3.44 per share for total cash proceeds of \$15,000 and previously recognized share-based compensation expense of \$4,000.

During 2012, 184,482 options were exercised at a weighted-average price of \$2.25 per share for total cash proceeds of \$417,000 and previously recognized share-based compensation expense of \$167,000.

### (c) Per Share Amounts

Per share amounts were calculated on the weighted-average number of shares outstanding. The basic and diluted shares outstanding were as follows:

Three Months Ended March 31,	2013	2012
<i>(000s, except per share amounts)</i>	<i>(\$)</i>	<i>(\$)</i>
Net loss for the period	<b>(627)</b>	(3,199)
	(#)	(#)
Weighted average number of common shares		
– basic and diluted	<b>73,188</b>	63,321
	<i>(\$)</i>	<i>(\$)</i>
Net loss per weighted average common share		
– basic and diluted	<b>(0.01)</b>	(0.05)

## 10. Share-Based Compensation

The Company has an option program that entitles officers, directors, employees and certain consultants to purchase Company shares. Options are granted based on the five-day volume-weighted average common share price prior to the date of grant, vest 20 percent after six months and then 20 percent on the first, second, third and fourth anniversaries from the grant date and expire five years from the grant date.

The number and weighted-average exercise prices of stock options are as follows:

	Three Months Ended March 31, 2013		Year Ended December 31, 2012	
	Options	Weighted- Average Exercise Price	Options	Weighted- Average Exercise Price
	(#)	(\$)	(#)	(\$)
Outstanding – January 1	<b>5,699,632</b>	<b>3.19</b>	4,382,200	2.89
Issued	<b>70,000</b>	<b>6.12</b>	1,565,058	3.93
Exercised	<b>(4,572)</b>	<b>3.44</b>	(184,482)	2.25
Forfeited	<b>–</b>	<b>–</b>	(63,144)	3.23
Outstanding – end of period	<b>5,765,060</b>	<b>3.23</b>	5,699,632	3.19
Exercisable – end of period	<b>2,689,695</b>	<b>2.95</b>	2,427,430	2.86
Weighted-Average Exercise Price		Options Outstanding	Weighted- Average Contractual Life	Options Exercisable
<i>(\$)</i>		(#)	<i>(years)</i>	(#)
<b>As at March 31, 2013</b>				
<b>1.20 – 1.99</b>		<b>125,000</b>	<b>0.17</b>	<b>125,000</b>
<b>2.00 – 2.99</b>		<b>2,885,000</b>	<b>2.67</b>	<b>1,575,500</b>
<b>3.00 – 3.99</b>		<b>1,023,302</b>	<b>3.84</b>	<b>395,884</b>
<b>4.00 – 4.99</b>		<b>1,596,758</b>	<b>3.33</b>	<b>590,311</b>
<b>5.00 – 5.99</b>		<b>15,000</b>	<b>4.45</b>	<b>3,000</b>
<b>6.00 – 6.12</b>		<b>120,000</b>	<b>5.24</b>	<b>–</b>
		<b>5,765,060</b>	<b>3.06</b>	<b>2,689,695</b>

The fair value of the common share purchase options granted during the period was estimated as at the date of grant using the Black-Scholes option pricing model and the following weighted-average assumptions:

	<b>Three Months Ended March 31, 2013</b>	Year Ended December 31, 2012
Risk-free interest rate (%)	<b>1.23</b>	1.22
Expected life (years)	<b>3.10</b>	3.10
Expected volatility (%)	<b>70</b>	77
Expected dividend yield (%)	<b>0</b>	0
Fair value of options granted during the year (\$/share)	<b>2.84</b>	1.97

A forfeiture rate of 2 percent for options granted during 2013 (2012 – 1 percent) was used when recording share-based compensation expense. This estimate is adjusted to the actual forfeiture rate. Gross share-based compensation was \$614,000 for the quarter ended March 31, 2013 (2012 – \$725,000). Of this amount, \$20,000 was reclassified to operating expenses for amounts relating to field employees (2012 - \$27,000) and \$194,000 was capitalized (2012 - \$281,000), resulting in total net share-based compensation expense of \$400,000 for the period (2012 - \$417,000).

## 11. Supplemented Cash Flow Information

Changes in non-cash working capital are comprised of:

Three Months Ended March 31,	<b>2013</b>	2012
(000s)	(\$)	(\$)
Accounts receivable	<b>2,307</b>	2,444
Prepaid expenses and other	<b>138</b>	104
Accounts payable and accrued liabilities	<b>7,484</b>	6,716
	<b>9,929</b>	9,264
Related to operating activities	<b>1,279</b>	(1,643)
Related to financing activities	<b>16</b>	98
Related to investing activities	<b>8,634</b>	10,809
	<b>9,929</b>	9,264

## 12. Determination of Fair Values

A number of the Company's accounting policies and disclosures require the determination of fair value for financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

### a) Property and Equipment and E&E Assets

The fair value of property and equipment recognized in a business combination is based on market values. The market value of property and equipment is the estimated amount for which property and equipment could be exchanged on the acquisition date between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. The market value of petroleum and natural gas properties (included in property and equipment) and E&E assets is estimated with reference to the discounted cash flows expected to be derived from oil and natural gas production based on externally prepared reserve reports. The risk-adjusted discount rate is specific to the asset with reference to general market conditions.

The market value of other items of property and equipment is based on the quoted market prices for similar items.

## (b) Cash and Cash Equivalents, Accounts Receivable, Accounts Payable and Accrued Liabilities

The fair value of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. The fair value of these balances approximated their carrying value at March 31, 2013 due to their short term to maturity.

## c) Stock Options

The fair value of stock options is measured using the Black-Scholes option-pricing model. Measurement inputs include share price on measurement date, exercise price of the instrument, expected volatility (based on weighted-average historical volatility adjusted for changes expected due to publicly available information), weighted-average expected life of the instruments (based on historical experience and general option-holder behavior) and the risk-free interest rate (based on Government of Canada bonds).

## d) Derivative financial instruments

As at March 31, 2013, the Company had the following crude oil and foreign exchange risk management contracts, with a total mark-to-market liability of \$183,000:

Period	Commodity	Type of Contract	Quantity	Pricing Point	Contract Price
Jan. 1/13 – Dec. 31/13	Crude oil	Collar	250 bbls/d	WTI – NYMEX	US\$85.00/bbl (floor) – US\$111.00/bbl (cap) <sup>(1)</sup>
Jan. 1/13 – Dec. 31/13	Crude oil	Collar	250 bbls/d	WTI – NYMEX	US\$90.00/bbl (floor) – US\$113.25/bbl (cap) <sup>(2)</sup>
Jan. 1/13 – Dec. 31/13	Crude oil	Collar	250 bbls/d	WTI – NYMEX	US\$90.00/bbl (floor) – US\$116.25/bbl (cap) <sup>(3)</sup>
Jan. 1/13 – Dec. 31/13	Crude oil	Collar	250 bbls/d	WTI – NYMEX	US\$95.00/bbl (floor) – US\$118.00/bbl (cap) <sup>(4)</sup>
Jan. 1/13 – Dec. 31/13	Crude Oil	Collar	500 bbls/d	WTI – NYMEX	US\$90.00/bbl (floor) – US\$106.00/bbl (cap) <sup>(5)</sup>
May 1/13 – May 31/13	Crude Oil	Differential	500 bbls/d	EDMONTON SWEET	CAD\$2.65
May 1/13 – Dec 31/13	Crude Oil	Fixed	500 bbls/d	WTI-NYMEX	CAD\$97.43/bbl

(1) Unless the monthly WTI price averages over US\$111.00/bbl every day for the entire month, in which case the cap becomes US\$90.00/bbl.

(2) Unless the monthly WTI price averages over US\$113.25/bbl every day for the entire month, in which case the cap becomes US\$92.00/bbl.

(3) Unless the monthly WTI price averages over US\$116.25/bbl every day for the entire month, in which case the cap becomes US\$92.00/bbl.

(4) Unless the monthly WTI price averages over US\$118.00/bbl every day for the entire month, in which case the cap becomes US\$100.00/bbl.

(5) Unless the monthly WTI price averages over US\$106.00/bbl every day for the entire month, in which case the cap becomes US\$90.00/bbl.

Period	Currency	Type of Contract	Quantity	Pricing Point (Cdn\$/US\$)
Jan. 1/12 – Dec. 31/13	US\$	Average Rate Range Bonus Accumulator	US\$700,000	Target – \$1.10 Cdn\$/US\$ + \$1,000 bonus/day <sup>(1)</sup>
June 1/12 – Dec. 31/13	US\$	Average Rate Range Bonus Accumulator	US\$900,000	Target – \$1.0775 Cdn\$/US\$ + \$900 bonus/day <sup>(2)</sup>

1) The Company can earn a bonus payout of up to \$1,000 per day depending on the period in which the exchange rate remains in the applicable range of equal to or greater than \$0.9350 and equal to or less than \$1.10.

2) The Company can earn a bonus payout of up to \$900 per day depending on the period in which the exchange rate remains in the applicable range of equal to or greater than \$0.9300 and equal to or less than \$1.0775.

DeeThree classifies the fair value of these transactions according to the following hierarchy based on the nature of the observable inputs used to value the instrument.

- Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and volume to provide continuous pricing information.
- Level 2 – Pricing inputs are other than quoted prices in active markets included in Level 1. Prices are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs, including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace.
- Level 3 – Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The fair value measurement of the derivative financial instruments has a fair value hierarchy of Level 2.

### 13. Related Parties

The following summarizes the Company's related-party transactions as at March 31, 2013:

The Company has retained a law firm to provide legal services. The Corporate Secretary of DeeThree is a partner of this firm. During the period ended March 31, 2013, the Company incurred \$144,000 with the firm (2012 – \$161,000), included in general and administrative expenses and share issuance costs, of which \$98,000 remained in accounts payable at March 31, 2013 (March 31, 2012 – \$94,000). Services provided related to advice and counsel primarily in the areas of general legal, corporate governance and banking matters. The Company expects to continue using this firm in 2013.

### 14. Commitments

Years Ended December 31,	2013	2014	2015	2016+	Total
(000s)	(\$)	(\$)	(\$)	(\$)	(\$)
Operating lease – office	480	640	640	160	1,920
Operating lease – equipment	164	47	–	–	211
Exploration expenditures (flow-through)	11,879	–	–	–	11,879
Drilling contracts	3,762	587	–	–	4,349
<b>Total</b>	<b>16,285</b>	<b>1,274</b>	<b>640</b>	<b>160</b>	<b>18,359</b>

As at March 31, 2013, the Company had contractual obligations for its office leases totaling approximately \$1,920,000 to March 2016. The head office lease obligations are comprised of the lease payments as well as parking and an estimate of occupancy costs of the Company's head office space. The Company also had contractual obligations for several vehicles and equipment totaling approximately \$211,000 to May 2014.

In connection with the issuance of flow-through shares by the Company during the first quarter of 2012, DeeThree is required to spend \$17,253,450 of eligible exploration expenditures by December 31, 2013. As at March 31, 2013, \$10,379,450 of these have been incurred. The remaining \$6,874,000 will be incurred during 2013. These expenditures were renounced to shareholders in January 2013 effective December 31, 2012.

In connection with the issuance of flow-through shares by the Company during the fourth quarter of 2012, DeeThree is required to spend an additional \$5,005,000 of eligible exploration expenditures by December 31, 2013. As at March 31, 2013, \$nil of these have been incurred. They will be incurred during 2013 and were renounced to shareholders in January 2013 effective December 31, 2012.

DeeThree has two contracts for drilling rig services under which the Company is committed to using services totaling \$4,349,000 extending into late 2013.

During 2012, DeeThree entered into a farm-in agreement with a senior oil and natural gas producer pursuant to which it may earn 100 percent working interest in up to 34 additional sections of Belly River petroleum and natural gas rights directly offsetting DeeThree's Brazeau property. DeeThree is committed to drilling a minimum of three horizontal wells on the farm-in lands with a continuing rolling option thereafter in return for a 15 percent non-convertible overriding royalty.

## 15. Subsequent Events

On May 6, 2013, DeeThree entered into a commodity swap for 500 bbls/d of crude oil effective June 1, 2013 to December 31, 2013 at a fixed price of CAD \$95.03/bbl.
